

# Self-Hosting UE Courses — Quick Info

Most United Educators (UE) policies include access to our online library of education-specific courses. Your institution can deploy courses through our Learning Portal or host them on your learning management system (LMS).

This document provides an overview of the self-hosting option. By signing a no-cost license agreement, your institution can download UE course files and deploy them to on platform your team manages.

Visit [ue.org](https://ue.org) to view our course catalog or learn about deploying courses through the UE Learning Portal.

## Key Benefits of Self-Hosting

- Direct control over the learning experience, risk and compliance messaging, and user account provisioning
- Fewer systems for learners to access
- Less administrative work because you can assign, track, and report training through your existing LMS and any connected systems

## Next Steps

- Learn more about [self-hosting training and review FAQs](#).
- Verify with your system administrator that the platform supports SCORM (Sharable Content Object Reference Model) standards prior to executing any agreement

## Initiate the Licensing Agreement

- [License Agreement Request Form](#)
- You will have two options in the request form for signing the agreement:

### Option 1: eSignature

- There is a link on the submission confirmation page that will let you create and sign the digital version of the agreement.

### Option 2: PDF

- [Download the PDF version](#)
- Upload the signed PDF where indicated in the [License Agreement Request Form](#)
